Education

● Intermediate Pass

South Valley International School
2014 - 2021
Mantri Hills, Betma, Indore

● Bachelor of Technology

Acropolis Institute of Technology and Research
2022 - current
Mangliya Square, Near Bypass , Indore

Skills

Skill	Rating
Organized	●●●
Communication	●●○
Teamwork	●○○
Meeting deadlines	●●○
Critical thinking	●●○

Hands On Projects

● Data Analysis

Hands-On Project: Electric Vehicles Market Size Analysis with Python. In this project, I conducted a market size analysis of the Electric Vehicles (EV) market using Python. Market size analysis is crucial for understanding sales potential, market saturation, and growth opportunities.

● Data Science

Music Recommendation System using the Spotify API and Python. It aims to help users discover new music based on their preferences and listening behavior. Personalized music recommendations are crucial in today's digital music platforms like Spotify and Apple Music.

● Machine Learning

Image Classifier using Convolutional Neural Networks to differentiate between happy and sad images. In this project I trained my model using Neural Networks as a deep Learning Algorithm to classify and differentiate between happy and sad emotions.
